Education

University of Illinois at Chicago

Dec 2020

Computer Science Engineering, B.S.E (in-major GPA: 3.46)

Programming Coursework: Data Structures, Systems Programming, Object Oriented Design, Software Engineering, Database Systems, Development of Mobile Apps, Video Game Design, Computer Algorithms

Skills

Programming Languages: (proficient): C, C++, Java, C#, HTML, CSS (familiar): Python, JavaScript

Frameworks and tools: Git, MS Visual Studio, NetBeans, ASP, JUnit, MySQL, IceScrum, React

Projects

Networked Video Game

- o Developed as part of a team a video game using Unity and C# that has the player control a robot that must survive the night against a horde of teddy bears.
- o Integrated networking to allow multiple players to create a game to help each other survive.
- o Acted as project manager and presented goals and deadlines at meetings to complete the project.

Bug Tracker

- o Created a web site which can be used by organizations to keep track of bugs found in their software using ASP.NET Core and the MVC architecture.
- o Followed the agile methodology, Scrum, to plan out sprints with tasks that could be completed weekly to ensure the project was completed in a timely manner.

Gradebook App

- o Created an app using Java that allows instructors to keep track of student grades.
- o Incorporated persistent data storage to archive the classes and grades the user has entered.
- o Designed UI using XML incorporated in Android Studio to easily navigate through the app.

Budget App

- o Developed an application using Visual Studio which allows a user to add and edit budgets.
- o Incorporated persistent data storage which saves user budgets on local storage.

Employment

Customer Service Specialist

Best Buy

Sep 2014 – Dec 2020

- o Handled transactions while greeting clients and answering the phone
- o Provided basic technical support for a wide range of company products
