Projects

almazankaze.github.io: To see or try out featured projects, plus more not listed.

Networked Video Game
- o   Developed as part of a team a video game using Unity and C# that has the player control a robot that must survive the night against a horde of teddy bears.
- o   Integrated networking to allow multiple players to create a game to help each other survive.
- o   Elected as project manager to present goals and deadlines at meetings to complete the project.

Bug Tracker
- o   Created a web site which can be used by organizations to keep track of bugs found in their software using ASP.NET Core and the MVC architecture.
- o   Followed the agile methodology, Scrum, to plan out sprints with tasks that could be completed weekly to ensure the project was completed in a timely manner.

Search Anime
- o   Created a user interface database with React to help people find their next anime to watch.
- o   Pulls data from an API to display information about a particular anime to the user.

Budget App
- o   Developed an application using React which allows a user to add and edit budgets.
- o   Incorporated persistent data storage which saves user budgets on local storage.

Employment

Customer Service Specialist   **Best Buy**   **Sep 2014 – Jan 2021**
- o   Processed transactions such as sales orders, returns and exchanges.
- o   Helped drive a positive customer experience by building relationships, exhibiting empathy, and providing solutions to customer needs.

Crew Member   **Dunkin Donuts**   **Jun 2009 – Apr 2012**
- o   Coordinated facility maintenance and put in charge of hardware refreshes.
- o   Supervised and instructed company crew members.
- o   Monitored inventory levels and ordered to meet demands.
